

Axis is the LMS with 9-Box Performance Management

Introducing the **Performance Management App** – available exclusively with the **Axis LMS**.

Set up and manage Kirkpatrick (aka 9-box) performance evaluations right inside the **Axis LMS**, with complete control over each part of the grid including the verbiage, ranges for each data point, and more. Once set up, you can create assessments for performance, which can then be filled out and applied to learners by their managers.

Create and Manage Customized Performance Evaluations

- ★ Create your own 9-box configuration with verbiage for each box.
- ★ Set up custom performance ranges to apply to low, medium and high performance data points.
- ★ Set up custom potential ranges to apply to low, medium and high potential data points.
- ★ Create custom performance assessments for use by your managers.
- ★ Each assessment can contain both 'performance' and 'potential' questions – each with a target point value.
