

Axis is the LMS with Live Classes Scheduling

The screenshot displays the configuration interface for the Axis LMS. It is organized into several sections:

- Available Seats:** A slider control set to 100 seats.
- Default E-Commerce Settings:**
 - Sell Class:** A dropdown menu set to "Yes".
 - Class Price:** A text input field containing "495.00".
- Default Class Schedule Settings:**
 - Show Class in Catalog:** A dropdown menu set to "Always show an upcoming class".
 - Hide Class from Catalog:** A dropdown menu set to "1 day(s) before the class begins".
 - Show in Calendar:** A dropdown menu set to "No".
- Default Email Settings:** A section header for email-related configurations.

Introducing the **Live Classes Feature**, the built-in live class scheduler enabling you to integrate your live classroom training with your online training — available exclusively with the **Axis Learning Management System (LMS)**!

Blend your Online and Classroom Training Programs

- ★ Set up live classroom training locations and addresses.
- ★ Create live classroom training schedules and offerings.
- ★ Create live classes that can be sold via the shopping cart also available in the Axis LMS.
- ★ Enable live classes to be shown in the calendar component for learners to see.
- ★ Setup reminder emails to go out to those that signed up for the class.
- ★ Setup notification emails that go out to the instructor when a learner signs up for their class.
- ★ Link an Online Course to a class so users that sign up for the class also get enrolled into the online course.
