

Axis is the LMS with Multi-Level Access

In **Axis LMS**, **Trainers** and **Managers** can be granted access to do most of what the LMS Administrator can do – for their own downstream organization and/or trainees (and in their own private space).

From **creating content**, to **managing reports and learners**, to **sharing** and more – the **exclusive Manager system** in **Axis LMS** creates scalability like never before!

Create Organizational Topologies of Managers, Trainers & Learners

- ★ Each learner can be assigned one manager, and an unlimited number of trainers.
- ★ Each manager can be assigned a manager above, and unlimited trainers.
- ★ Managers and trainers are granted access to the 'Manager Portal' by their manager, or any manager upstream.
- ★ Managers & trainers can be granted access to use the system much like the LMS Administrator - complete with all authoring, tracking and management tools for developing their own Learning Environments.
- ★ Managers can be granted access to pull up reports on all managers and learners in their downstream organization.
- ★ Managers, trainers and learners are all 'Users', and therefore your limit can be as high as the user limit of your system.
